### L'AZIENDA

- TXT e-solutions creates new Division TXT Sense to develop and market innovative applications of New Augmented Reality.  
The Board of Directors of TXT e-solutions Spa has approved the creation of a new Division of the Company, named TXT Sense, to develop and market innovative applications of New Augmented Reality to many service and industrial sectors.  
TXT's offering is based on proprietary solutions and on highly specialised TXT personnel, who have had their natural incubator in TXT Next, where these technologies have been deployed successfully in advanced aeronautic application.  
TXT's so-called Augmented Objects have outstanding visual and aesthetic qualities and are used and shared simply and interactively via smartphone.  
The application sectors to be addressed by TXT Sense include luxury and fashion, advanced manufacturing, medical, retail, media and advertising, these last through intriguing new formats.
