

## COMPANY PROFILE

---

Moviri is a leading provider in IT Performance & Optimization solutions and consulting services. Moviri Services practice areas span Capacity Management, IT Operations, Testing, Analytics and Security. As the IT optimization experts, Moviri consultants make applications and services run faster, use less resources and meet business demands.

For more than a decade, Moviri has delivered hundreds of successful projects, supporting critical enterprise initiatives in virtualization, cloud computing, capacity optimization and service management, and it has developed software products that address critical customer needs in capacity planning and digital content discovery.

Moviri has long standing relationships with enterprise customers in Europe, North America and Asia and counts BMC, HP and Splunk among its partners. Moviri is headquartered in Milan, Italy with offices in Europe and the United States. For more info please visit [www.moviri.com](http://www.moviri.com)

## TECHNICAL FIELDS OF SPECIALIZATION

---

### Security

IT Performance also means making applications and systems safe and secure. Protect confidentiality, ensure integrity and maintain availability of your data and your systems with Moviri's testing, intelligence and protection services. Moviri's Security experts are widely respected veterans in the industry, with decades of experience in the ICT security market.

**Our services:** Security Governance, Security Intelligence, Identity Access Management, Infrastructure Security

### Analytics

Leveraging its background in data mining, Moviri delivers reporting, visualization and data discovery services. Moviri partners with Splunk to collect, index and analyze machine data, whether it is generated by IT systems, sensors in a manufacturing facility, RFID tags or events from mechanical or security systems, creating real time dashboards of IT and business KPIs.

**Our services:** Reporting, Data Discovery, Visualization Change

### Testing & Optimization

Application performance and availability is the most critical non-functional requirement of IT services, directly impacting business outcomes. How do you reduce the risks introduced by changes and test applications to ensure safe deployments? Moviri consultants design, execute and analyze the most thorough Functional, Performance and Security tests in the industry. **Our services:** Performance Testing, Infrastructure Testing, Security Testing

### Monitoring & Troubleshooting

Moviri offers a full range of services to benchmark, monitor and automate the IT operations of large enterprises. Moviri's services include end-user monitoring, portfolio management, incident & problem management, configuration management and data center automation, in partnership with vendors like BMC, HP and Netscout.

**Our services:** Application Performance, System & Network Monitoring, Incident & Problem Management, Service Level Management

### Capacity Management

Capacity Management is Moviri's core and most distinctive capability. Moviri has spent more than a decade developing capacity planning software and delivering enterprise-grade capacity management projects. We are BMC partners and know intimately BMC's capacity management solution, TrueSight Capacity Optimization.

**Our services:** Application & Service Capacity, Infrastructure Capacity, Data Center Capacity

### Operations & Cloud Management

Moviri's cloud management services enable customers to provision, deploy, configure and automate enterprise IT. From configuration management to change management to data center automation, Moviri helps you automate the most time consuming and repetitive tasks in managing your IT assets with tools like HP, BMC and Rightscale.

**Our services:** Change Management, Configuration Management, Cloud Management, Data Center Automation
